D

994 CERTIFICATION. (REV 5-18-05) (FA 6-29-05) (1-06)

ARTICLE 994-7 (Pages 950 and 951) is deleted and the following substituted:

R

994-7 Certification.

For permanently installed signs, the Contractor shall be required to furnish to the Engineer one certified test report from the sheeting manufacturer documenting that the retroreflective sheeting meets the requirements of this Section. The certified test report shall include test results for retroreflectivity, color, adhesive backing properties, film description, tensile strength, specular gloss, shrinkage, flexibility and chemical resistivity. The certified test report shall affirm the product meets all the requirements specified. If test results indicate significant inconsistencies in material properties, new qualification tests and/or comparison with original infrared spectroscopic values may be required. Each certification shall cover only one type of retroreflective or nonreflective sheeting or film. The certification shall meet the requirements in Section 6. Due to the wide range of applications of the products within some types, the certification shall additionally state that this product is recommended for use on this specified project.

A

Certification shall not be required for signs used in the work zone.
