Without knowing the background for this proposed change, this specification, 8-4.1 Night Work, seems to be omitting several key issues.

- 1) Equipping all vehicles with flashing lights...
- 2) Ensure all personnel wear reflective vests...
- 3) Have a certified worksite supervisor on site during nighttime operations...

These are issues where we constantly seem to have problems with Contractors, throughout our operations; Permits, Construction, and Maintenance Contracts. This may be an area where re-emphasis is appropriate.

I would recommend we not delete these items.
