

4551506 - STRUCTURES FOUNDATIONS – DRILLED SHAFTS - EXCAVATION
COMMENTS/RESPONSES FROM INDUSTRY REVIEW

John Farrell
386-961-7725

Comments:

We understand that this deletion will be accompanied by a directive to project personnel to maintain the subject drilling logs, to be implemented by adding this responsibility to the listed duties required of the inspector in CPAM. It is, of course, essential that this change be made contemporaneously with the deletion of the duties from 455.

Response: It is already in CPAM Ch 10.6
