FAX: (386) 740-1275

Comments:

Please replace '(of the Supplemental Specifications)' with (Pages 219 and 220).
There isn't a Supplemental Specification for Section 285 to the 2007 Spec book.

Response:

Done

Comments:

The proposed change to section 285 refers to 200-7.3.1.2 for non-asphalt bases and 290-4 for subbase. Section 290-4 defines the size of the core holes to be used but 200-7.3.1.2 does not. If this change is implemented, then Section 200 should be modified as well.

Response:

Modified 285 to address the required hole diameter as follows:

285-6.1 Measurements: For non-asphalt bases, meet the requirements of 200-7.3.1.2 as determined by FM 534.
