Comments:

Recommend consolidating the requirements for obtaining precast structures from plants listed on the Departments list of Producers with Accepted Quality Control Programs into 1 place, it is repeated in sections 407, 410 , 430 and 449 currently in industry review.

Response: That is the purpose of this change. 407, 410, 430 and 449 reference the general requirement. The details have been moved to Section105.

The revision to section 449 includes the same verbiage as the 3rd paragraph of 430-1; suggest the reference in 430-1 be deleted.

Response: The verbiage is repeated; however, the producers referenced in 430 may not be the same producers as 449. No change made.

The last paragraph of 430-1 is repeated in the last 2 paragraphs of 449-1. Suggest deleting the last paragraph of 430-1.

Response: The verbiage is repeated; however, the producers referenced in 430 may not be the same producers as 449. No change made.

Remove the period between 'of.105-3' in the 3rd paragraph of 430-1.

Response: Change made.

Comment

Revision date 10-15-07, Spec. #430-1, insert between the third and fourth paragraph of this revision, the third paragraph from the new 407-1 revision date 10-15-07.

Response: This requirement is located in the Materials Manual Section 6.1 Volume II. If it is added here, it would be a repetition since MM 6.1 Volume II is required as contract document through Specification Section 105. No change made.
