In 460-1, identify what is meant by "Metal Drainage Products". Is that to include CMP, gratings, skimmers, etc. Need to be specific as to what is required. Do we need to have an "Erection Meeting" for this items (460-7)? Should Metal Drainage Products be included in spec 430?

Is the "STRUCTURAL STEEL AND MISCELLANEOUS METALS" referred to Section 460 the same as the "STEEL AND MISCELLANEOUS METAL PRODUCTS" listed in the second paragraph of the proposed 105-3.1 spec? Many of the materials are the same but not all (i.e. guardrail). It may be helpful to better reconcile these two specs?
