Comment:

The last sentence of 521-7 reads, “For precast and cast-in-place concrete barrier wall that has been installed, the disposition of concrete cracks shall be in accordance with 400-21.” I propose the following change, “For installed precast and cast-in-place concrete barrier wall that has been installed, the disposition of concrete cracks shall be in accordance with 400-21.” Reason: Clarity. The paragraph starts with “precast not installed”. The proposal flows better referring to “installed precast”. Also, installation of cast-in-place wall is redundant since “cast-in-place” already refers to it.

Response:

Agree that wording could be better so the following revision is provided:

The disposition of concrete cracks in barrier wall after installation shall be in accordance with 400-21.
