

EXPECTED IMPLEMENTATION JULY 2009

410 PRECAST CONCRETE BOX CULVERT-PLACEMENT OF MULTIPLE BARREL CULVERTS.

(REV 5-6-08) (FA 10-8-08) (7-09)

SUBARTICLE 410-10.4 (of the Supplemental Specifications) is deleted and the following substituted:

410-10.4 Placement of Multiple Barrel Culverts: For multiple barrel installations using single-cell precast box sections, provide positive lateral support between the precast box culverts consisting of non-shrink grout, concrete meeting the requirements of Section 347 or non-excavatable flowable fill prior to backfilling. Provide partial height backfill or bracing to maintain alignment, when approved by the Engineer.
