Comment:

Subarticle 916-2.1: Write out the word gallons in the sentence below. For all recycling agents used in all hot mix asphalt, silicone shall be added to the recycling agent at the rate of 25 cm³ of silicone mixed to each 5,000 gal. of recycling agent.

Response:

Agreed. Change made at two locations in the document.

Comment:

Why are we making this change if ultimately the authority resides with the Engineers Office ? - State Materials Engineer *Office*

Response:

Agreed. Previous wording restored.

Comments:

916-2.1: The fifth paragraph indicates allowing liquid anti-strips to be added at a rate of 0.25 – 0.75%. Is there a need to have more than two dosage rates? I think we should keep the two current rates of 0.5% and 0.75%.

Response:

Agreed. The specification was changed to 0.50 to 0.75. There are no mix designs with 0.25%, so this is a non-issue.
