Comments:

Should the 104 changes be modifying the new Supplemental Spec that will be implemented in January, rather than the book?

Response: Yes (ft). These changes will be rolled into the Supplemental Spec in July 2010 Workbook. Due to the timing of the spec's implementation, 104-9 and 104-10 will be updated to the current version.

Comments:

Some of the methods of measurement listed in 104-9 do not correspond to the recent changes in items and item descriptions included in the recently reviewed/revised section 1040600.

Response:
See response to Missy Hollis above.

Comments:

Subarticle 104-10, mowing may not be needed in both paragraphs

Response:
Agreed. Changes have been made.

Comments:

I've got a good many comments and a few questions concerning the changes to mowing and litter removal. Spec 104, 107 and 570 were under review but I also included comments on 580 regarding this subject. I did discuss briefly with Paul Steinman and Larry Ritchie to get a better idea on the intent of the changes before I commented. As always I appreciate the chance to comment.

1. Note that this is not the latest version of Supplemental Specification 104
2. 104-10 (Basis of Payment) 1st and 2nd paragraphs. Remove references to mowing.

Response:

See responses above.
