Comment: (7-14-10)

330-10.1.6 Use of Traffic Roller on First Overbuild Course - consider removing for the same reason 330-10.1.7 is being removed.

Response:

This is a reasonable request, however, since no one else from Industry or the Department has had a chance to review this request, it will be incorporated into the next cycle of specification changes. No changes made at this time.
