

9720300 Recycled Plastic Products - Materials
COMMENTS FROM INTERNAL/INDUSTRY REVIEW

Comment: (6-1-10) Section 972 is probably not needed anymore. The only remaining recycled plastic products are rebar chairs, bolster, and spacers and guardrail offset blocks. These requirements can probably be included in either Section 415 or 536. This will be reviewed and incorporated in future changes.

Response: The QPL office felt that Section 972 should remain to define recycled products. No changes made.

Comments: (6-3-10) Although not listed here, the very first sentence of the spec (972-1) says that all recycled products used shall be included on the QPL. Looking at just this spec it would lead one to believe that any recycled plastic product has to be on the QPL.

Response: The first sentence will be revised. Changes made.
