Are the amounts correct for the 15,000,000 up to 20,000,000? It does not look correct to me.

Response: Values are correct. Determinations are based heavily on CEI costs for projects and during the evaluation periods used for these calculations, the \$15M to \$20M projects had lower project costs. This occasionally happens and is usually based on work types done during that evaluation cycle.

The amount incrementally goes up from \$3,226 to \$4,624 then down to \$4,276. Look at the \$15 million to \$20 million the LD's went down. Appears to be a mistake.

\$5,000,000 but less than \$10,000,000.....	\$2,514 3,226
\$10,000,000 but less than \$15,000,000.....	\$3,300 4,624
\$15,000,000 but less than \$20,000,000.....	\$3,782 4,276
\$20,000,000 and over	\$5,684 7,864 plus

Response: See response above.
