Comments: (7-11-11)

District 4 Construction has the following comments: 783-3.3 makes reference to the new Index no. 17700 but also refers to 635 of the spec.'s which still has the index no, for the standard pull box installation. If you are going to continue to refer to 635 then 635 should be revised to instruct the contractor follow either standard as appropriate. In lieu of this spec. why don't you include the fiber optic pull boxes in with Section 635 since they are not just for ITS projects?

Response:

The Index reference in 635 was changed in the January 2011 Workbook. ft
