Could we spell out what SPCC stands for? Spill Prevention, Control and Countermeasure.

561-10.3 Containment System: Submit a written containment system design plan in accordance with this section and the contract documents at the pre-construction conference or as directed by the Engineer which clearly describes the proposed containment system applicable to the intended removal method and in accordance with the requirements outlined herein and **SSPC** Guide 6, Guide for Containing Debris Generated During Paint Removal Activities.

Response: SSPC is the acronym for ‘Society of Protective Coatings’ and is listed/defined in Section 1 of the Spec Book. This guide describes methods of paint removal, containment systems and procedures for minimizing or preventing emissions from escaping the work area, and procedures for assessing the adequacy of the controls over emissions.
No change made.
