I have reviewed this proposed change and have a concern with the wording of the first paragraph of 781-7.1. I think it would be better if the wording stated that this DMS was to be installed on a new or existing structure as shown in the plans.

In this section, I am just curious to know why the Dynamic Message Sign (DMS) proposed change item No. was listed as 781-4 (In blue), when in the basis of estimate the ITS DMS is 781-1. Will 781-1 and 781-4 be two different DMS system?
