Comment: (10-30-12)

Why not create a separate pay item for sidewalk cover plates instead of making them incidental to the bridge deck joint? They are not always required and are pretty costly which will only result in the statewide average for bridge deck joints being skewed.

Response: The revision is only a clarification of the existing method of payment. Currently, sidewalk cover plates are incidental to bridge deck joints. Any skew to the statewide average would currently be seen. No change made.
