Comment: (7-18-13)

District One ITS Section has reviewed the above referenced spec with the old 781-4 HAR spec. Below are our comments/questions.

1. Add highway advisory radio acronym to section 687-1 and remove from section 687-2.1.

Response:
See 6870000 Comments and Responses.

2. Why removing minimum surge protection requirements per 785 from this spec?

Response:
See 6870000 Comments and Responses.

3. Why removing the requirement for a controller from this spec?

Response:
See 6870000 Comments and Responses.

4. Why removing minimum grounding test requirements per 785 from this spec?

Response:
See 6870000 Comments and Responses.

5. Remove DATs reference from the second to last sentence under section 687.4.

Response:
See 6870000 Comments and Responses.

I have attached the document (Birosak attachment 7-18-13) we created to compare the 2 specs and see the differences.
