

EXPECTED IMPLEMENTATION JANUARY 2014

D

**915 CEMENTED COQUINA SHELL MATERIAL.
(REV 1-22-13) (FA 2-15-13) (1-14)**

ARTICLE 915-1 (Page 984) is deleted and the following substituted:

915-1 Composition.

Cemented coquina shell materials to be used as cemented coquina base or stabilized base, shall be defined as naturally occurring deposits formed essentially of broken mollusk shell, corals and the skeletal remains of other marine invertebrates, which are presently found as “dry land” deposits and which have been cemented together by carbonates or other natural cementing agents.

Approval of mineral aggregate sources shall be in accordance with 6-2.3.
