Comments for section 105:
105-8.8.7.3 Flexible Filler Injection: Perform all filler injection operations under the direct supervision of a Filler Injection Foreman who has **ASBI** certification in the injection process being used, or verifiable experience performing injection of similar flexible filler on at least two projects. Provide at least two CTQP Qualified Grouting Technicians, one of whom must be a Level II CTQP Qualified Grouting Technician, both of whom must be present at the site of the flexible filler injection work during the entire duration of the operation.
 Provide a Filler Injection Quality Control (QC) Inspector who has **ASBI** certification (I did not see where this acronym was defined?) in the injection process being used, or verifiable experience performing injection of similar flexible filler on at least two projects.

duration of the operation. ¶

→ → → → Provide a Filler Injection Quality Control (QC) Inspector who has ASBI certification in the injection flexible filler process being used, or verifiable experience performing injection of similar flexible filler on at least two projects. The Filler Injection QC Inspector must be present at the site of the flexible filler injection work during the entire duration of the operation. ¶

→ → → → Verifiable experience performing injection of similar flexible filler

2. 105-8.8.7.3, 3rd paragraph: Do we just verify the experience? I think we should verify the experience and approve the technician for the job? Otherwise, if we do not like the person, we will not be able to reject him. Also, do you see any problems with having two small project experience that handles major project? If we hold the right to approving it, this concern would be eliminated.

of the operation.¶

→ → → → Verifiable experience performing injection of similar flexible filler on at least two projects is acceptable in lieu of ASBI certification in the flexible filler process.¶

→ → → → Perform all flexible filler repair operations under the direct supervision of a crew foreman who has been trained and has verifiable experience in the use of vacuum flexible filler repair equipment and procedures. Submit the crew foreman's training and experience records to the Engineer prior to performing any flexible filler operation.¶
