Are we not going to have any more induction lighting? Also in 992-1.9.4 the "120V" needs to spell out "volt".

Response: Section 992-1.2, the second paragraph allows induction. Change made to volt in Section 992-1.9.4.

992-3.4.2: Has the letters "FAA". Is this the Federal Aviation Association? If it is, then it should be defined in the FDOT Specs.

Response: Yes, it is the Federal Aviation Administration. Will define in this Section. Change made.
