The calculation for the fuel and bit adjustment will be based on a statewide average for fuel costs that will be provided on the 15th of each month on the State Construction Office website. Due to the fluctuation of fuel costs across the state would it be possible to breakdown the fuel cost by County or District. This would be similar to the way statewide averages are broken down for construction cost estimates. Chad O. Rucks, P.E. Project Oversight III FDOT, D4 - Treasure Coast Operations 3601 Oleander Avenue Fort Pierce, FL 34982 Desk: (772) 429-4938

Response: The quotes are voluntarily provided by the major oil companies that are reasonably expected to furnish fuel for projects throughout the State of Florida.
