No issue as written. But, "unless stored in a sealed container overnight" might be a little more tolerable. If you're in a remote location, storing trash cans in a conex box and disposing of weekly might be easier for the contractors.

Isn't the information contained in the spec change already covered in the 7-1.4. The link already says not to feed and contact appropriate personnel.

IF this change is made, will the litter pick up pay item quantity reflect the cycles as daily and not per month??

Should there be any mention of lock-top garbage bins or is the intent that no leftover food trash be left onsite.

Perhaps the SP needs to state that the Department will provide instruction at a Pre-Construction meeting.
