No issue as written. But, "unless stored in a sealed container overnight" might be a little more tolerable. If you're in a remote location, storing trash cans in a conex box and disposing of weekly might be easier for the contractors.

Response: Proposed revisions to address this concern.

Isn't the information contained in the spec change already covered in the 7-1.4. The link already says not to feed and contact appropriate personnel.

Response: The link does not include direction to the contractor regarding garbage or feeding bears.

IF this change is made, will the litter pick up pay item quantity reflect the cycles as daily and not per month??

Response from State Specifications Engineer: No change will be made to the litter removal pay item.

Should there be any mention of lock-top garbage bins or is the intent that no leftover food trash be left onsite.

Response: Proposed revisions to address this question.

Perhaps the SP needs to state that the Department will provide instruction at a Pre-Construction meeting.

Response: Considered but not necessary for this species. This does not preclude the discussion from occurring at the pre-construction meeting though.

Please include scientific name.

Response: Will include.
