Comments: (11-7-17)

7101000 and 7091000 indicate a 2' - 2' skip strip. However if each skip strip element is 2 foot long and is placed at a 2 foot spacing, don't they become a solid line and no longer a dashed line?

Response: These markings consist of a 2' long line segment with a 2' gap.
No change made.
