Comments: (1-27-23) So, misc asphalt included in all repairs. but paid separately for remove and replace. I'm good with this. (hope interpretation is okay. Had a lot of noise on the phone during the teams call) I don't need a response if this is correct. thanks.

Comments: (2-9-23) 536-3.15.2 - May read better if reworded, removing "paint" reference: Apply a galvanizing compound as specified in article 562 over galvanized structural members and areas where previously applied galvanized compound is deteriorated when specified by the Contract Documents. 536-6.8 - change wording from paint to galvanized coating or galvanizing compound. 536-6.9 - last sentence ...repairs of existing guardrail, including repairing or adjusting hardware and blocks.

Response:

Comments: (2-9-23) 536-6.9 - Can we include the following under this Misc. item: patching of miscellaneous asphalt and removal of debris and materials from underneath the guardrail and end treatments. This would be helpful to address accumulation of silt buildup that contributes to vegetation growth under our guardrail.
