

Specification Section 334

Subarticle 334-1

ORIGINATION

Date: 5-8-2025

Name: Ahmad Chami

Email: Ahmad.Chami@dot.state.fl.us

COMMENTARY

Incorporated Materials Bulletin 22-03, which increased the allowable amount of RAP in polymer modified structural mixes. Eliminating restrictions on the use of SP-19.0 mixtures has the potential to speed up construction and will also increase flexibility for pavement design.

INDUSTRY COMMENTS AND RESPONSES

(Please note all comments and responses are verbatim as received. The Specifications Office does not alter typos or grammar.)

COMMENT: We appreciate the opportunity to review and provide feedback. Could you clarify how this specification update aligns with the potential implementation of an 80% RAP binder replacement limit, and whether these efforts are related?

RESPONSE:

This is a good question. The change proposed in this specification revision is not related to the 80% RAP binder availability specification change, which was strongly considered a year ago, but was rescinded. That change is on hold, with no scheduled implementation date at this time.

ACTION TAKEN:

No change made to the proposed specification.
