COMMENTARY

Language needs to be changed to correct terminology and indicate that WWVDS may be used to monitor other roadway segments in addition to ramps.

INDUSTRY COMMENTS AND RESPONSES

COMMENT: Second para of Sec 660-4.4.1 refers to 'ramp lane' and 'ramp paved shoulder.'
Should 'ramp' word be changed to 'location' and 'paved shoulder location' instead?

RESPONSE: The existing language for true positive testing is geared towards ramps versus other road segments. Some details of ramp testing, such as lane closures and speeds, may not be appropriate or possible on other road segments. The draft has been updated accordingly.

ACTION TAKEN: Proposed changes have been edited to clarify that existing details for true positive testing are specifically for ramps and that the approved field acceptance test must describe and govern the specific details of testing for other road segment types.
