

Specification Section 633

Subarticle 633-2

ORIGINATION

Date: 6-9-2026

Name: Ronald Meyer

Email: Ronald.Meyer@dot.state.fl.us

COMMENTARY

Changes are needed to incorporate Cable Support Wire content moved from Section 632 and clarify default minimum length of pre-terminated patch panel cable stubs.

INDUSTRY COMMENTS AND RESPONSES

(Please note all comments and responses are verbatim as received. The Specifications Office does not alter typos or grammar.)

BLACK = Comment **BLUE** = Specifications Response **GREEN** = Change Made to Specification

Date: 7-1-2026

COMMENT: The proposed revisions appear to contain cross-references that may become invalid if the companion revisions to Section 632 are adopted as intended. Article 633-2.2.1 references Section 632-2.2, while the stated purpose of the Section 632 revision is to delete Article 632-2.2 and relocate those requirements to Section 633. In addition, Article 633-2.2.2 references Section 632-2.32, which appears to be a numbering error in the companion Section 632 revision and is expected to be Article 632-2.3. Please verify that these cross-references are updated so they remain valid in the final published specifications.

RESPONSE: We have doublechecked the proposed revisions to both Section 633 and Section 632 and confirmed that the current markups for recommended changes align correctly. Perhaps there was an issue with the markups displaying properly when previously viewed but the postings at <https://www.fdot.gov/specifications/review/specifications-track-the-status-of-revisions> appear correct (most recent check on 7/30/2026).

ACTION TAKEN: No additional action or changes needed.
