Are changes in line with promoting and making progress on improving safety, enhancing mobility, inspiring innovation, and fostering talent; explain how?

MM Sec 9.2V2- By not specifying over-design strength for pavement concrete could improve the durability of the concrete and ensure the uniformity of materials properties.

What financial impact does the change have; project costs, pay item structure, or consultant fees?

None

What impact does the change have on production or construction schedules?

MM Sec 9.2V2- The change will support the stabilization of construction schedules by offering alternatives to concrete producers when faced with aggregate supply shortages.

How does this change improve efficiency or quality?

MM Sec 9.2V2- The update would shift risk to the producer to have the qualified pavement concrete mix.

Which FDOT offices does the change impact?

Construction and Materials Offices.

What is the impact to districts with this change?

MM Sec 9.2V2- Districts should see fewer delays to construction caused by limited aggregate supplies for concrete.

Does the change shift risk and to who?

MM Sec. 9.2V2- The update would shift risk to the producer to have the qualified pavement concrete mix.

Provide summary and resolution of any outstanding comments from the districts or industry.
