Name: Keith Kummer

Date: 9-3-2024

COMMENT: In addition, pit proctor IV sampling for base mainline should be changed to one per 4000 LF, and one per 8000 LF for non-mainline rather than lot counts. Doing so is a cost savings initiative when compared to current over-sampling of short lots at radii as an example.

RESPONSE:

This specification does not cover sampling and testing as described. This comment would be long in any proposed draft for Section 200.

ACTION TAKEN: None.
