Email: Ronald.Meyer@dot.state.fl.us

COMMENTARY

The language needs to be changed to update requirements based on stakeholder input and for consistency with warranty language for other traffic control devices.

INTERNAL COMMENTS AND RESPONSES

BLACK = Comment **BLUE** = Specifications Response **GREEN** = Change Made to Specification

COMMENT: We need to discuss warranties per signals. The warranty should start when FDOT receives the value of using signal equipment. I have a job in D5 where we installed the ped detection (and traffic signals) over a year ago. The prime has over 50 claims, and the job has not been final accepted. FDOT will have used the signal equipment for almost two years before the warranty starts.

RESPONSE: The Department has made changes in the recent past to reduce warranty durations for certain signal devices based on input from multiple stakeholders, including the FTBA LESS Committee and device manufacturers.

We are not considering additional changes to warranty start dates during this update cycle.

Modifications to warranty language during this cycle are to remove repetitive references and for consistency with other related Sections.

ACTION TAKEN: No change.
