WM	Water Main

# Introduction

## 1.1 Project Background and Description

The Florida Department of Transportation (FDOT) is conducting the SR-5/US-1 at Aviation Boulevard Project Development and Environment (PD&E) Study to evaluate potential capacity and operational improvements to the intersection of SR 5/US-1 and Aviation Boulevard/32nd Street, Indian River County, Florida. The existing roadway (Aviation Boulevard) connects to US-1 with two eastbound lanes and one westbound lane. The existing intersection has railroad crossing signals, traffic control signals, and pedestrian crossings. The west of the railroad crossing is property under the control of the Vero Beach Regional Airport. The airport has regulations that control construction for both ground (Runway Protection Zone) and aerial (Flight Surface) zones. Figure 1 shows the project location.

Figure1. Project Location Map

The project aims to improve the intersection of SR 5/US 1 and Aviation Boulevard in Vero Beach, Florida. The proposed improvements included in the SR 5/US 1 at Aviation Boulevard project are to expand Aviation Boulevard and the existing railroad grade crossing to provide four eastbound lanes (1 right, 1 through, 2 lefts), a median separator, and two westbound through lanes. A shared-use path would be along the south side of Aviation Blvd and US-1 would be expanded to provide northbound dual left turns and southbound dual right turns. The project will include Roadway, Drainage, Signalization, and Lighting Design.

The primary purpose of the project is to evaluate intersection improvement solutions to address existing and projected traffic demands, improve safety, support economic growth, and enhance modal interrelationships with rail, bicycle, and pedestrian modes.

## 1.2 Proposed Build Alternative

As a result of the alternative analyses conducted for the project, a Preferred Alternative was identified for further analysis. The Preferred Alternative includes the recommended interchange /intersection concept and the overall SR 5/Aviation Boulevard corridor typical section and alignment. Appendix A provides the preliminary concept plans for the Preferred Alternative.

The Preferred Alternative for the project includes the following proposed improvements:

- Expanding the intersection of SR 5/US 1 at Aviation Boulevard to provide four eastbound lanes (1 right, 1 through, 2 lefts), a median separator, and two westbound through lanes to improve traffic flow.
- Milling and Resurfacing of Side Streets
- Swale Regarding
- Installation of sidewalks
- Drainage improvements
- Reconfiguration of the Traffic Signals
- Lighting Improvements
- New Signing and Pavement Markings

## Purpose

A utility, as defined in FDOT's Utility Accommodation Manual (UAM), is all active, deactivated, or out-of-service electric transmission lines, telephone lines, telegraph lines, other communication services lines, pole lines, ditches, sewers, water mains, heat mains, gas mains, pipelines, gasoline tanks, and pumps owned by the Utility Agency Owner (UAO). Conflicts with utilities affect both the cost and schedule of a project and can influence the selection of the preferred alternative. FDOT must consider the potential for encountering utilities within the limits of the project, including associated pond sites and other off-site improvements. This Utility Assessment Package includes the identification of Utilities within the project area. The information can be used to avoid major utility conflicts and in choosing corridors or alternatives to carry forward. The goal of this effort is to assist with the development of project plans that avoid conflicts with major utility facilities. While it is important to determine all utility facilities within the study

limits, the focus is to identify the utility facilities that could: (a) entail lengthy or drawn-out coordination efforts, (b) may be cost-prohibitive to relocate, or (c) rise beyond the level of ordinary utility coordination.

## Methodology

The process to discover utilities during the phase consists of three stages: UAO Coordination; and Utility Assessment Package.

The PD&E Request Package consists of the concept plans overlaid on an aerial background. A request is made for each UAO to provide information for above-ground and below-ground utility facilities within the PD&E project area, for both existing and planned utility facilities. Also included is a request for each UAO to provide information pertaining to any existing easements or other property interests that may be affected by the project. The contacted UAOs are requested to review the concept plans and identify their major utility facilities and other obstructions or encroachments within or adjacent to the project. Each UAO was to identify both existing and planned utility installations in, or adjacent to, the project limits. The UAOs are requested to respond in writing and delineate their facilities and any property interests on the concept plans, in accordance with Chapter 14-46, Florida Administrative Code (F.A.C.) and the Utility Accommodation Manual (UAM).

The Utility Coordination stage includes meetings with the UAOs to discuss utility impacts related to the project alternatives. The meetings included discussions for timelines for new installations or relocations that are anticipated to be unavoidable, potential relocation costs, and any easements or property interests that could be affected. The information provided by the UAOs was used in preparing the Utility Assessment Package.

## Utility Agency Owners

The existing and proposed utility facilities within the study area were identified throughout the project corridor as part of this PD&E Study. A list of the existing Utility Agencies Owners (UAOs) was obtained by contacting Sunshine 811. A field review was also conducted to further identify any designated existing facilities in the project corridor. All the UAOs identified in the field were also noted on the Sunshine 811 list. The existing UAOs, the identified UAO contacts, and the facility type are summarized in Table 1.

Preliminary utility coordination was initiated through written communication to the listed utility contacts. The UAOs were informed of the PD&E study through notification letters and were requested to provide information regarding the location, type, dimension, and characteristics of any major utilities along or crossing the existing right-of-way. UAOs were requested to note if any utility facility is located within the FDOT right-of-way by easement or permit and to provide an order-of-magnitude worst-case estimate for the cost of relocating any utilities affected by the proposed project. The information obtained from the UAOs is documented in this technical memorandum.

## Utility Description

The existing utility facilities include power, gas, water, wastewater, and communications. A preliminary plan set with the aerial background was sent to all identified UAOs within the project area. The plan set was provided for their use in documenting their facilities. Information received from the various UAOs can be found in the Appendix.

Based on the initial utility coordination effort, no proposed utility facilities were identified within the existing or proposed right-of-way. The general location of the existing utility facilities described below is based on the Utility Agency Owners' response and their accompanied documents. The exact locations of the existing utilities and the extent of impacts will be determined during the design phase of this project. Coordination with the UAOs during the design phase will assist in minimizing relocation adjustments and disruptions of service to the public.

Provided below is a summary of the existing facilities within the project corridor. All stations provided are approximate.

**AT&T Florida** owns the following facilities within the project's study area.

- (2) 1800PR Direct Buried Copper Cables west side of SR 5, running south from the ending of the project and turning east along the north side of 33rd St.
- 1800PR Direct Buried Copper Cable west side of SR 5, running south from 33rd St. and turning east along the north side of 31st St.
- Direct Buried Copper Cable on the west side of SR 5, running north-south along the entire project limit.
- 1800PR Direct Buried Copper Cable west side of SR 5, running south from approximately 100' north of 31st St. and turning east along the north side of 31st St.
- 200PR Buried Copper Cable in 1-4" PVC Conduit crossing SR 5 just south of 31st St.
- Overhead Telephone on the east side of SR 5, running north from 31st St. to the ending project limit.

**AT&T Transmission** owns the following facilities within the project's study area.

- 1-2" BFOC HDPE Duct within the FEC Railroad right of way, running north-south along the entire project limits.

**The City of Vero Beach** owns the following facilities within the project's study area.

- 8" CIP Water Main on the east side of SR 5, running north from the beginning of the project to a Gate Valve south of the Main Canal Bridge.

- 12" CIP Water Main on the east side of SR 5, running north from a Gate Valve south of the Main Canal Bridge to a Gate Valve south of 30<sup>th</sup> St.
- 8" CIP Water Main east side of SR 5, running north from Gate Valve south of 30<sup>th</sup> St. past project limits.
- 8" DIP Water Main east side of SR 5, running east along the south side of 30<sup>th</sup> St.
- 16" DIP Water Main crossing SR 5 at the north side of the Main Canal Bridge, running west from a Gate Valve on the east of SR 5 to a Gate Valve outside the right of way.
- 12" DIP Sanitary Force Main crossing SR 5 within a 20" Steel Casing, running west from 30<sup>th</sup> St. to the outside of the right of way.
- 16" PVC Water Main crossing SR 5 within a 30" Steel Casing, running west from 13<sup>th</sup> Ave, along 31<sup>st</sup> St. to the outside of the right of way.
- 8" V.C.P Sanitary Sewer Main Along 31<sup>st</sup> St., running 375' west from a Manhole on 13<sup>th</sup> Ave to another Manhole on 31<sup>st</sup> St.
- 8" V.C.P Sewer Laterals along 31<sup>st</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 16" PVC Re-Use Water Main along 31<sup>st</sup> St. running from 13<sup>th</sup> Ave to SR 5.
- 2" PE Water Laterals along 31<sup>st</sup> St. running between 13<sup>th</sup> Ave and SR 5
- 2.5" PVC Water Main along 32<sup>nd</sup> St. running from 13<sup>th</sup> Ave to SR 5.
- 1" PE Water Laterals along 32<sup>nd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 2.5" PVC Water Laterals Casing along 32<sup>nd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 8" V.C.P Sanitary Sewer Main along 32<sup>nd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 8" V.C.P Sewer Laterals along 32<sup>nd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 24" PVC Effluent Transmission Force Main crossing SR5 within a 42" Steel Casing, running east from the western right-of-way line to 13<sup>th</sup> Ave through 33<sup>rd</sup> St.
- 8" V.C.P Sanitary Sewer Main along 33<sup>rd</sup> St., running 475' west from a Manhole on 13<sup>th</sup> Ave to another Manhole on 33<sup>rd</sup> St.
- 8" V.C.P Sewer Laterals along 33<sup>rd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 6" PVC Water Main along 33<sup>rd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 1" PE Water Laterals along 33<sup>rd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 2.5" PVC Water Laterals Casing along 33<sup>rd</sup> St. running between 13<sup>th</sup> Ave and SR 5.
- 14" DIP Water Main Crossing Aviation Blvd west of the FEC Railroad right of way, running from right of way to right of way.
- Water Meters on the east side of SR 5, between the beginning and ending project limits, and along 31<sup>st</sup> St., 32<sup>nd</sup> St., and 33<sup>rd</sup> St.
- Water Valves on the east side of SR 5, between the beginning and ending project limits.
- Sanitary Air Release Valves along 30<sup>th</sup> and 33<sup>rd</sup> St.
- Water Main Air Release Valve along 31<sup>st</sup> St.
- Sanitary Sewer Manholes along 32<sup>nd</sup> and 33<sup>rd</sup> St.
- Fire Hydrants on the east side of SR 5, between the beginning and ending project limits.

**Comcast** owns the following facilities within the project's study area.

- Overhead Cable TV on the east side of SR 5, running north from a pole south of 31<sup>st</sup> St., turning east and running on the northside 31<sup>st</sup> St.
- Overhead cable TV on the east side of SR 5, running north from a pole north of 32<sup>nd</sup> St. past project limits.
- Overhead cable TV on the east side of SR 5, running east from a pole at the north side of 33<sup>rd</sup> St. to 13<sup>th</sup> Ave.

**Crown Castle** owns the following facilities within the project's study area.

- 288 Count Buried FOC on the east side of SR 5, running north-south along the entire project limits.

**Florida City Gas/NextEra** owns the following facilities within the project's study area.

- 6" PE Gas Main on the east side of SR 5, running south from the end of the project and turns east on the north side of 32nd St. for approximately 50 ft to a Gas Valve. It runs west from the Valve across SR 5 and continues on the north side of Aviation Blvd past project limits.

**FP&L Distribution** owns the following facilities within the project's study area.

- 120V Overhead Electric crossing SR 5 north of 30<sup>th</sup> St., running from a pole on the west side of SR 5 to a pole on the east side of SR 5.
- 2 Phase 13KV Overhead Electric on the east side of SR 5, running from a pole north of 30<sup>th</sup> St. to a pole on the north side of 33<sup>rd</sup> St.
- 3 Phase 13KV Overhead Electric on the east side of SR 5, running north from a pole on the north side of 33<sup>rd</sup> St. past project limits.
- 3 Phase 13KV Overhead Electric crossing SR 5., running east from beyond the western right-of-way line to 13<sup>th</sup> Ave to 13<sup>th</sup> Ave along the north side of 33<sup>rd</sup> St., turning south on the west side of 13<sup>th</sup> Ave. and running past project limits.
- 3 Phase 13KV Overhead Electric Crossing Aviation Blvd just west of the FEC Railroad right of way.
- 3 Phase 13KV Buried Electric Crossing Aviation Blvd just west of the FEC Railroad right of way.

**FP&L Transmission** owns no facilities within the project's study area.

- No facilities

**Indian River County Utilities** owns no facilities within the project's study area.

- No facilities

**Lumen (CenturyLink) National** owns the following facilities within the project's study area.

- 3-2" HDPE Duct within the FEC Railroad right of way, running north-south along the entire project limits.

**Resurgence Infrastructure Group** owns the following facilities within the project's study area.

- 528 Count fiber in 1-1.5" HDPE Duct within the FEC Railroad right of way west of SR 5, running north-south along the entire project limits.

**Sprint** owns the following facilities within the project's study area.

- 96 Count fiber in 1-2" HDPE Duct within the FEC Railroad right of way, running north-south along the entire project limits.

**Verizon** owns the following facilities within the project's study area.

- 12 and 24 Count fiber in 1-2" HDPE Duct within the FEC Railroad right of way, running north-south along the entire project limits.
- 96 Count fiber in 1-2" HDPE Duct within the FEC Railroad right of way, running north-south along the entire project limits.

# Build Impacts

The estimated impacts to utility facilities resulting from the recommended Build alternative are itemized by location in Table 2, along with estimated relocation costs. It should be noted that no cross-section information has been provided at this time. The estimated impacts are based on the data provided by the UAO as previously summarized. Actual utility impacts will be verified during the design phase when a detailed survey and subsurface utility information are available.

It is anticipated the municipal water and sewer providers (City of Vero Beach) may request a Utility Work by Highway Contractor Agreement (UWHCA), as demonstrated on past projects of similar scope, dependent on the magnitude of impact to their facilities.

# Cost Estimates

Conservative utility relocation estimates based on the Preferred Alternative were requested as part of the utility coordination process and subsequent follow-up with the Utility Agency Owners. The total combined estimated cost for relocations, regardless of the UAO’s potential for reimbursement, is \$3,320,325.73.

**TABLE 2: UTILITY IMPACTS FROM PROPOSED BUILD BY LOCATION**

Utility Type	Transverse or Adjacent	General Location	Size	Approx. Conflict Length	Impacts	Cost Estimate
<b>AT&amp;T FLORIDA</b>						
(2) BT	Adjacent	West side of SR 5, running south from the end of the project and turning east along the north side of 33 <sup>rd</sup> St.	1800PR Copper	930'	Roadway construction SR 5	\$110,500.00

# Mitigation Recommendations

Mitigation measures should consider the following:

- The accurate location of all underground facilities to confirm a clear or conflict determination,
- The accurate location of all aerial facilities to confirm a clear or conflict determination,
- An innovative design approach to avoid the utility facilities and minimize impacts,
- The UWHCA option for unavoidable relocation of the water and sewer facilities,
- Minimizing the duration of unavoidable service disruptions,
- Allowing service disruption only during periods of no or minimum usage,
- Maintaining utility connections in temporary locations,
- Installing alternative or new facilities before disconnecting the existing facilities,
- Completion of the necessary utility work prior to the start of roadway construction, or prioritize the utility work to avoid the first phases of roadway construction,
- Removing Occupational Safety and Health Administration (OSHA) crane conflicts and utilizing low overhead construction techniques.

RE: **ADJUSTMENT OF UTILITIES – STATE STATUTES CHAPTER 337.403**

**Project:** SR-5(US-1) at Aviation Boulevard PD&E Study

**Description:** Aviation Blvd PD&E Study from 27<sup>th</sup> Ave to US1/SR5 and SR5 from 21<sup>st</sup> St. to 37<sup>th</sup> St.

**County:** Indian River County

**FPID:** 441693-1-22-02

**Project Development & Environmental (PD&E) Utility Assessment Report**

The Florida Department of Transportation (FDOT), is conducting a Project Development and Environment (PD&E) Study for the improvements to the above roadway(s). The PD&E study limits begin at Aviation Blvd. & 27<sup>th</sup> Ave and go east to US1/SR5, then continue along US from 21<sup>st</sup> St., north to 37<sup>th</sup> St. (See Attached Project Location map). In order to determine the best alternative for this project, we need to determine the location and anticipated impacts for all existing, proposed and out-of-service utility facilities within the project study limits, both underground and overhead.

For this purpose we are requesting your office mark on the attached plans (plans dated September 15, 2022), all your existing, proposed and out-of-service utility facilities, both inside and along the project study right-of-way lines, and/or within the limits as shown. We are further asking you return the marked plans and requested information (hard copy or electronic) to this office before **November 22, 2022.**

Please provide with your response the following information:

- Updated contact information for your Agency/Owner, providing name, phone, email and address.
- Attached plans marked to indicate the location, type and size of your existing, proposed and out-of-service facilities within the study limits, and indicate whether underground or aerial. Along with the marked plans, provide any atlas maps, GIS or other additional plans or information that might help to describe and define your facilities.
- Marked plans to show the limits of any easements, subordinations, or other property interests you may have along or within the study limits, and any existing or proposed encroachments onto those properties.
- A lump sum order-of-magnitude relocation cost estimate that approximates the cost to adjust or relocate all of your utilities within the project study limits. This estimate will not influence any detailed estimates furnished later; it is for the purpose of addressing any major impacts.
- An estimate of the time frames to relocate all of your utilities within the project limits. This estimate will not influence any detailed time frames furnished later.
- Whether you agency would be interested in entering a Utility Work by Highway Contractor Agreement, including whether this would include affected facilities or proposed installations.
- If you do not have any utility facilities within the study limits, please provide a No Facilities Letter.

Thank you for your attention and cooperation to this matter. Your input and continued cooperation on this project is essential. Should you have any questions do not hesitate to contact me directly at 561-713-1683, or send email to [matthew.phillips@wginc.com](mailto:matthew.phillips@wginc.com).

**RE: ADJUSTMENT OF UTILITIES – STATE STATUTES CHAPTER 337.403**  
**Project:** SR-5(US-1) at Aviation Boulevard PD&E Study  
**Description:** Aviation Blvd PD&E Study from 27<sup>th</sup> Ave to US1/SR5 and SR5 from 21<sup>st</sup> St. to 37<sup>th</sup> St.  
**County:** Indian River County  
**FPID:** 441693-1-22-02

**Project Development & Environmental (PD&E) Utility Assessment Report**

The Florida Department of Transportation (FDOT), is conducting a Project Development and Environment (PD&E) Study for the improvements to the above roadway(s). The PD&E study limits begin at Aviation Blvd. & 27<sup>th</sup> Ave and go east to US1/SR5, then continue along US from 21<sup>st</sup> St., north to 37<sup>th</sup> St. (See Attached Project Location map). In order to determine the best alternative for this project, we need to determine the location and anticipated impacts for all existing, proposed and out-of-service utility facilities within the project study limits, both underground and overhead.

For this purpose we are requesting your office mark on the attached plans (plans dated September 15, 2022), all your existing, proposed and out-of-service utility facilities, both inside and along the project study right-of-way lines, and/or within the limits as shown. We are further asking you return the marked plans and requested information (hard copy or electronic) to this office before **November 22, 2022.**

Please provide with your response the following information:

- Updated contact information for your Agency/Owner, providing name, phone, email and address.
- Attached plans marked to indicate the location, type and size of your existing, proposed and out-of-service facilities within the study limits, and indicate whether underground or aerial. Along with the marked plans, provide any atlas maps, GIS or other additional plans or information that might help to describe and define your facilities.
- Marked plans to show the limits of any easements, subordinations, or other property interests you may have along or within the study limits, and any existing or proposed encroachments onto those properties.
- A lump sum order-of-magnitude relocation cost estimate that approximates the cost to adjust or relocate all of your utilities within the project study limits. This estimate will not influence any detailed estimates furnished later; it is for the purpose of addressing any major impacts.
- An estimate of the time frames to relocate all of your utilities within the project limits. This estimate will not influence any detailed time frames furnished later.
- Whether you agency would be interested in entering a Utility Work by Highway Contractor Agreement, including whether this would include affected facilities or proposed installations.
- If you do not have any utility facilities within the study limits, please provide a No Facilities Letter.

Thank you for your attention and cooperation to this matter.

Owen,

Attached are the maps showing the CCF facilities within the limits of project 441693-1-52-01 in Indian River County. We have no facilities on sheets 17 through 26.

Let me know if you need anything more.

Regards, Danny

## Owen Smith

---

**From:** Baker, Jon <jabaker@cogentco.com>  
**Sent:** Wednesday, June 7, 2023 11:19 AM  
**To:** Owen Smith  
**Subject:** [EXTERNAL] RE: FPID 441693-1-22-02: Aviation Blvd PD&E Study from 27th Ave to US1/SR5 and SR5 from 21st St. to 37th St - Utility Greenline Markup Request

Owen,

Sprint's only facilities are within FEC Right of Way in a leased FEC owned 2" conduit. If your project will be impacting FEC ,please reach out to them for as-builts and coordination. If your project will not be impacting FEC R/W then we anticipate no involvement.

Let me know if you have any questions or need anything else.

My apologies for the slow response.

Thank You,

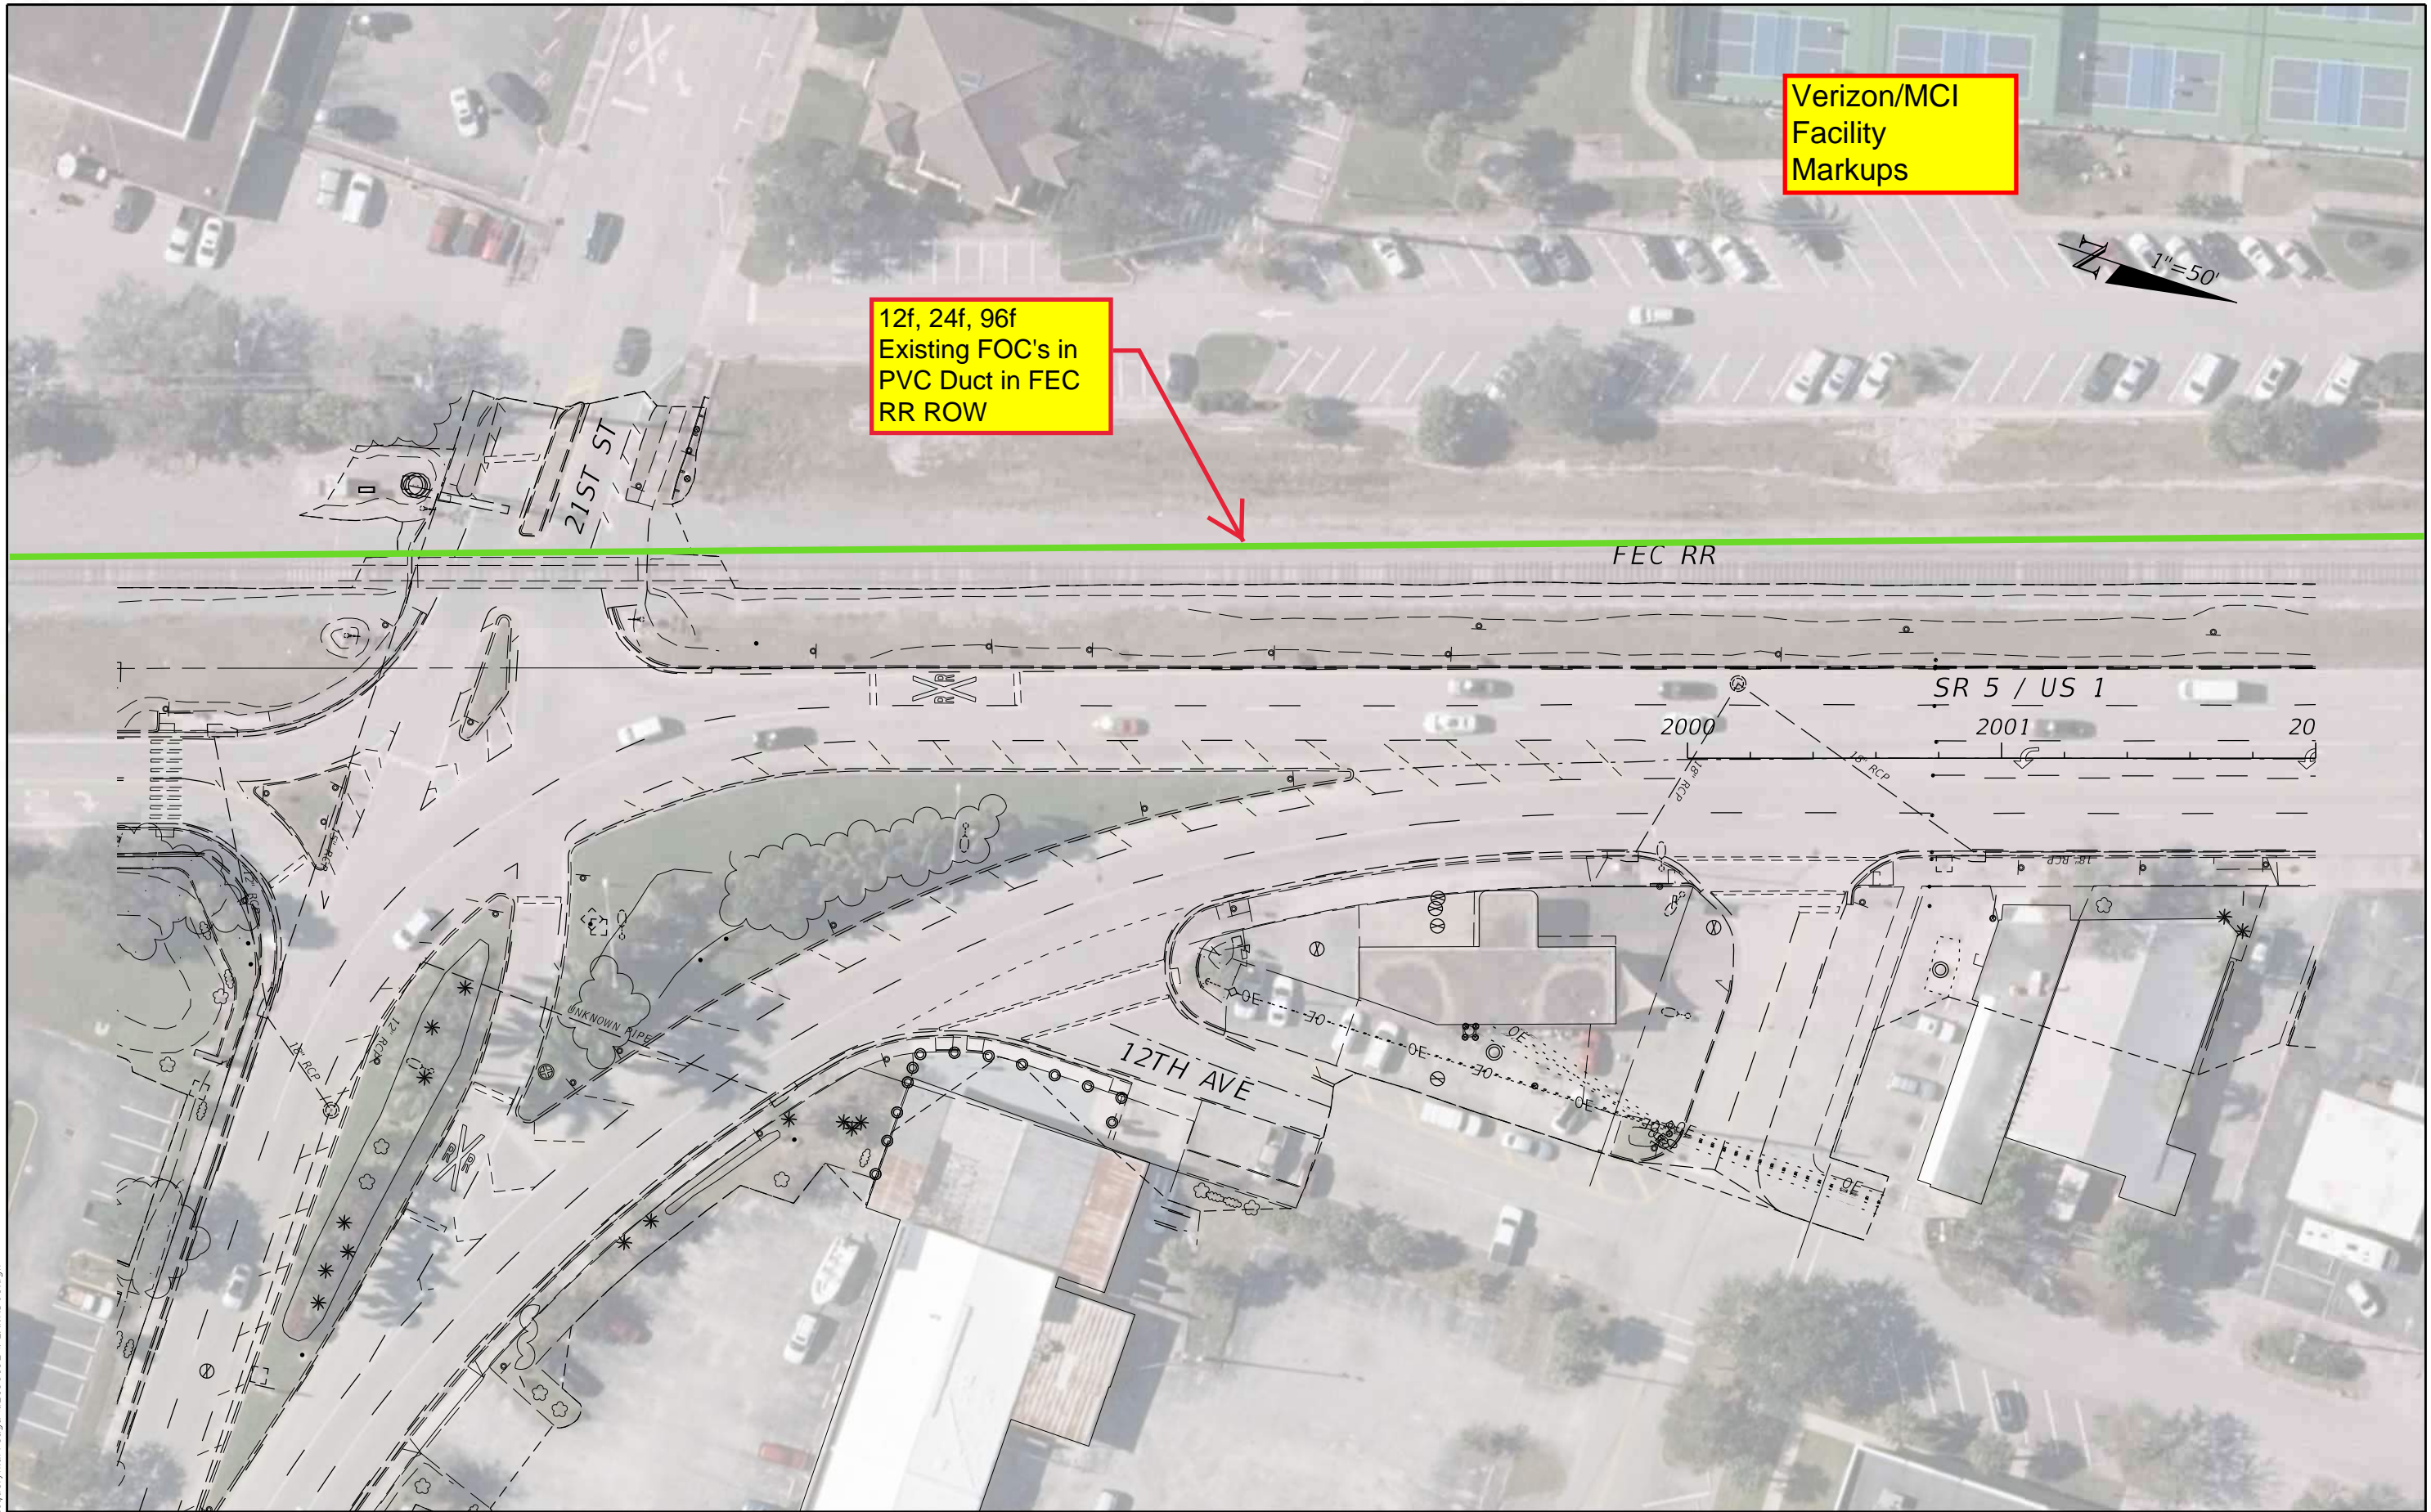

**Jon A. Baker** *Outside Plant Engineering East*  
**Cogent Communications, Florida – Remote**
