1.0 MULTIMODAL FREIGHT DATA INVENTORY MATRIX

The Data Inventory Matrix expands upon the current freight data inventory for the freight and modal data program and summarizes relevant data source information. The six-page matrix provided as an attachment to this section summarizes 89 data sources reviewed and analyzed as part of this work effort. Of the 89 data sources reviewed, 61 multimodal freight data sources are currently utilized by FDOT and 28 data sources not currently used by FDOT. The purpose of the task was to provide a comprehensive list of multimodal freight data sources and provide some important information regarding the data source and its usability within FDOT. Therefore the Data Inventory Matrix provides a snapshot view of the following categories for each data source:

- » Data Source Title – The title includes a hyperlink to the data source website.
- » Developer – The developer identified the primary creator and manager of each particular data source.
- » Used by FDOT – As mentioned above, this column identifies if the data source is currently being used within FDOT or not.
- » Update Frequency – The update frequency category provides information on how often the data is updated and includes the following categories:
 - » Hourly (H)
 - » Daily (D)
 - » Weekly (W)
 - » Monthly (M)
 - » Quarterly (Q)
 - » Bi-Annually (BA)
 - » Annually (A)
 - » Every 5 Years (5Y)
 - » Every 10 Years (10Y)
 - » Real Time (R)
 - » Discontinued (DC)
 - » Variable (V)
- » Geographic Coverage – The geographic coverage includes information regarding geographic and spatial coverage of the data source broken down into the following categories:
 - » Worldwide (WW)
 - » Nationwide (NW)
 - » Statewide (SW)
 - » Countywide (CW)
 - » Traffic Analysis Zone (TAZ)
 - » Enterprise Florida Regions (EFI)
- » Modal Coverage – The modal coverage column identifies if the data source includes multimodal information or if the data includes information on a particular mode. The modal coverage categories include: All, Road, Rail, Water, Air, Pipeline, and Space.
- » Data Access – The data access information includes important cost and licensing agreement overview for each data source:
 - » Free Data – Indicates if a data source is free to acquire or if there is a cost associated.
 - » User Licensing Agreement – Indicates if a licensing agreement is required to acquire particular data source or not.
- » Used by Florida Systems Plan: This column identifies if a particular data source is used by one of the major Florida Systems Plans including: Aviation, Transportation, Freight Mobility & Trade, Rail, Seaport, SIS, and Waterways.

The Data Inventory Matrix attachment is presented on the following pages:
