

Definition/Background: Notes the basic type of median ditches. Grader maintained ditches are calculated as a factor of grass median ditches.

Responsible Party for Data Collection: District Office of Maintenance

NOTE: All median inventories are to be coded against the right side of the roadway. If the below characteristics are located at a rest area, ramp, or other applicable sub-section, they are to be inventoried against the applicable sub-section number.

MDITHEXC

Number of Median Ditches (Excavator)

Roadside: R/L

Feature Type: Length

How to Gather this Data: Code the total number of median ditches between a beginning milepoint and an ending milepoint cleaned by excavator. This inventory is intended to depict work style. Do not inventory workload if not maintained in the manner described.

Value for Number of Median Ditches: 1 Byte: X

MDITPAVE

Number of Median Ditches (Paved)

Roadside: R/L

Feature Type: Length

How to Gather this Data: Code the total number of median ditches between a beginning milepoint and an ending milepoint that are paved. Breaks in paved areas of less than 150 feet will be included in the paved area inventories.

Value for Number of Median Ditches: 1 Byte: X

MDITPIPE

Number of Median Ditches (Piped)

Roadside: R/L

Feature Type: Length

How to Gather this Data: Code the total number of median ditches between a beginning milepoint and an ending milepoint that are piped and not connected with storm sewer systems.

Value for Number of Median Ditches: 1 Byte: X
