MEMORANDUM

TO: District Structures Design Engineers
(Gerard Moliere, Rod Nelson, John Golden, John Danielsen,
Neil Kenis, Kim Saing, Jose Rodriguez, Agnes Spielmann)
Area Structures Engineers
(Robert Robertson, Tom Andres, Don Keenan, Tony Mireles)

FROM: William N. Nickas, P.E., State Structures Design Engineer

COPIES: Secretary Tom Barry, Assistant Secretary Ken Morefield, District Secretaries (David Twiddy, Huey Hawkins, Edward Prescott, Rick Chesser, Mike Snyder, Jose Abreu, Ken Hartmann, Jim Ely), Freddie Simmons, Bill Domico, Jack Evans, Bob Nichols, Charles Boyd, Jeff Pouliotte, Andre Pavlov, FHWA, Dick Kane

SUBJECT: Temporary Design Bulletin C01-2 – EFFECTIVE: September 1, 2001

This memorandum, effective September 1, 2001, provides direction on the use of the 2001 LRFD English and Metric Structures Standards and future versions of these Standards, hereinafter referred to as “2001 Structures Standards.”

The 2001 Structures Standards comprise the latest and best practices of the FDOT in the areas of construction material usage, design code compliance, SDG design criteria and policy compliance, detail clarity, and pay item and Specification consistency and coordination. In this regard, the 2001 Structures Standards shall be incorporated on all projects (English, Metric, LFD, and LRFD) without exception unless this will result in a delay of the letting of the project.

The 2001 Structures Standards are available online in both “.dgn” and “.pdf” formats while all previous Standards are available only in “.pdf” format for reference purposes only. When requested in writing, versions of previous Standards may be made available in “.dgn” format on a case-by-case basis but only upon the approval of Mr. Robert Nichols; or, in his absence, Mr. Charles Boyd, both of this office.

If you have any questions or need any additional information on this topic, please contact Robert Nichols at (850) 414-4283, Charles Boyd at (850) 414-4275, or Andre Pavlov at (850) 414-4293.
