

- **Noise-Sensitive Sites Identified**
 - 11 residential communities
 - 3 recreational sites
 - 1 commercial
- **Detailed Noise Barrier Analysis**
 - Performed for future traffic conditions
 - Determines location of potentially reasonable and feasible noise walls (shown on next board)
- **Noise Barrier Surveys**
 - Input from benefited properties during Final Design will be used to determine support for noise walls
- **Noise Barrier Aesthetics**
 - Heights, limits, color, and texture will be coordinated with the City and community during Final Design

Example ground-mounted noise wall texture

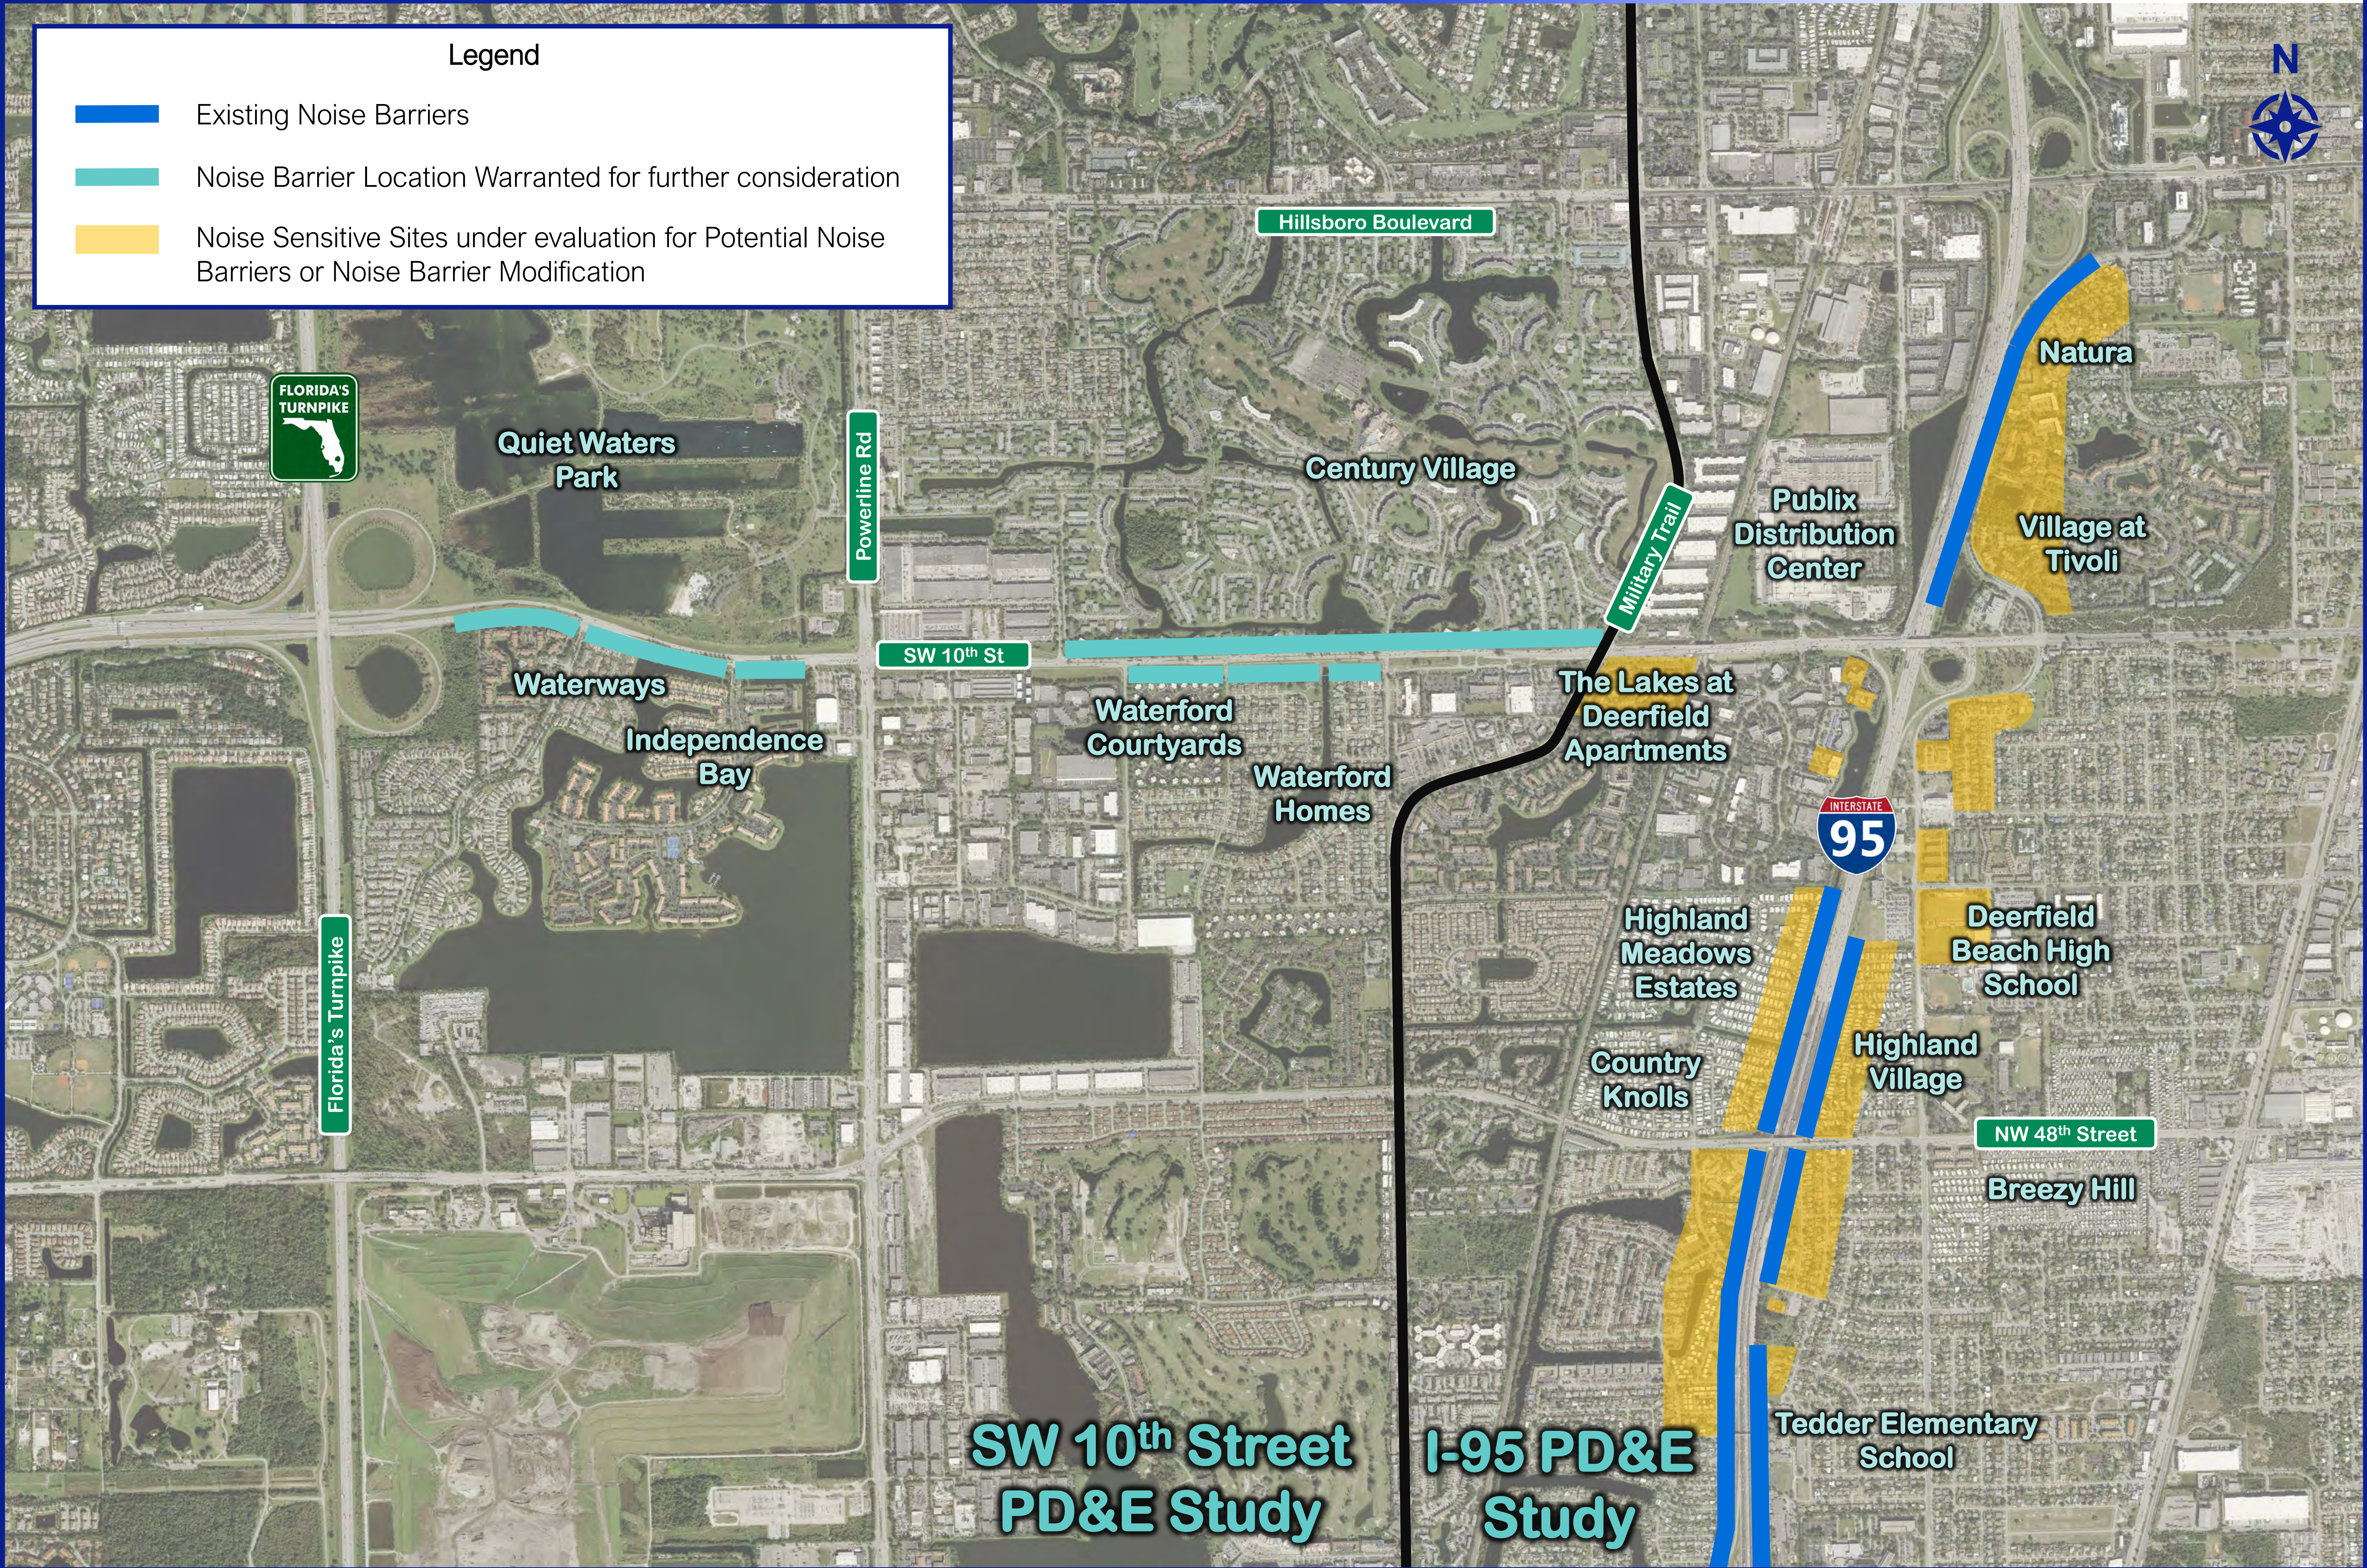

Example shoulder-mounted noise wall

Potential Noise Barrier Locations

Legend

- Existing Noise Barriers
- Noise Barrier Location Warranted for further consideration
- Noise Sensitive Sites under evaluation for Potential Noise Barriers or Noise Barrier Modification
