

AVL Data in C2C

Mark Dunthorn

- SG-3640 – Originally requested by District 3
 - Would allow Road Rangers to be visible in other SunGuide deployments

- More recently requested by the TIM program at the CO
 - Joint effort with FDOT GIS group
 - Goal is real-time locations of Road Rangers statewide on a map at the EOC

- What changes will be required?
 - New C2C data type and associated schema updates
 - Minor changes to Operator Map
- What data will be included?
 - Location (latitude/longitude)
 - Road Ranger Availability status (Patrolling, Arrived, etc.)

QUESTIONS?

TIM Reporting

Mark Dunthorn

TIM Dashboard

- Will describe limited set of relevant metrics, averaged statewide
 - Incident Clearance Time
 - Roadway Clearance Time
 - Number of Secondary Crashes
- Updated weekly

Solution

- Deploy a custom SunGuide report
- Configure a weekly scheduled task in SAS
- Report delivered via email – depends on SMTP server configured in SunGuide
- Central Office will provide report template and detailed instructions
