Florida Department of Transportations

SunGuide Software User Group Meeting Agenda

Date: October 28, 2010
Time: 10:00 AM – 11:30 AM
Tele: 4976 OR 850-414-4976

Legend: New information in italics; **Action items in bold   (thusly, new action items in bold-italics!)**

Introductions / Attendees

- Database Storage Discussion
    - Steve Novosad led a discussion to gather input to help him compile some recommendations / guidelines for database archiving.
        - How long to store what data?
        - Mark Laird brought up a helpful consideration of "Should some data be archived out of the system such that you would have to retrieve and rebuild access to the data or should it be online?"
        - Mary Thornton brought up the consideration that this should be driven by reporting requirements.
        - Mark Laird responded with the concern that reporting requirements can change and new ones can be created.
    - **Members should send any additional input to Steve Novosad (senovosad@pbsj.com) if they have anything they would like to add**
- FHP-CAD –
    - *ITS WAN is coming online in several places*
